

## EMPACT + COMS

### EMPACT (Exploration and Mining Project Activity Cost Tracking)

EMPACT provides project and cost management for your exploration and mining activities. Improve fiscal accountability and corporate governance, while reducing your overall operating costs. Key reporting of all costs and activities are provided on all of your projects. Data is synchronized daily between the central office and field users. Customized reporting gives a detailed precision that goes far beyond the use of spreadsheets.

### Features

EMPACT + COMS are an integrated product that provide the best overall project and cost management for your exploration and mining activities. The result is a workflow process and central data repository that increases efficiencies, cost savings and reporting over the course of the asset life cycle.

#### Comprehensive Project Cost Management System

- Field costs and project tracking for the entire exploration and mine asset life cycle
- EMPACT's integration to COMS and your accounting system, allows you to compare budgets to field estimates to actual costs
- Central database and documentation repository communicating all aspects of the project from geology, surveying, construction, drilling, bulk and surface samples, core reports, facilities, abandonment and site reclamation
- EMPACT offers all exploration and operational cost information in one place allowing for quick search and easy access by authorized users
- Daily summary reports let users know and control how much is being spent
- Partner or joint-venture reporting and distribution at the click of a button
- Improved tracking and accountability through a materials transfer system
- Easy user adoption and training. Most field users find themselves using the product in under an hour of training.

#### Reporting

- Improved project and cost tracking, and tight financial control through detailed daily and summary reporting
- Improved decision making by getting the data into the hands of those who can take management action
- Satisfy partner reporting needs quickly, saving time while improving relations

**COMS**  
Cost Management Solutions

## Support

- 24/7 support including server monitoring, call tracking, and logging using RES' 'Software as a Service' gateway

## Benefits

---

EMPACT allows for the streamlining of the workflow process through standardization while improving in-field cost control via the detailed capture of all exploration and mine-related expenditures. This is reinforced by a flexible daily reporting system that allows management the ability to act quickly on operational activities that are in need of attention resulting in better decisions.

### Control, Management and Cost Savings

- Consistent reporting from the field, replacing a diverse and uncoordinated ad hoc population of spreadsheets
- Cost savings through a comprehensive cost-tracking system, providing access to all levels of costing detail, vendors, field tickets, and work history
- Consolidation, streamlining and internal standardization of the work-flow processes
- Minimize the risk of errors by reducing manual processes
- Increased profit and growth by eliminating errors with fewer data entry points resulting in increased efficiency and time savings

## EMPACT + COMS

### COMS (Cost Management System)

The main benefit that Cost Management System (COMS) offers is the streamlining and automation your budget creation, approval and tracking process, while aiding in Sarbanes–Oxley US and Canadian compliance.

### Features

COMS is integrated to EMPACT. COMS streamlines and helps to automate the budget creation process while providing a clear audit trail for each entry into the system.

#### Spending Control and Authorization

- Ability to handle multiple projects
- Detailed creation, by line–item, of budgets either by using built–in templates or customized to the user’s GL accounting system
- Integrate data and functionality into the capital planning and budget system
- Compare budget to field–cost estimates to actual costs linked directly to your budget and accounting system streamlining the internal budget and accounting processes
- Adaptable to any company’s process
- A flexible COMS reporting system that generates standard or customized reports including accruals, variance, summaries and much more
- Import contracts and agreements from any internal system
- Authorized spending limits and detailed audit trail of approvals

#### Security and Work Flow

- Add employee spending limits and assign delegates
- Digital signatures, user–security and a digital audit trail of all approvals
- Electronic routing to reviewers and approvers
- Manage non–operated / partner expenditures
- Manage document storage easily in the database or link to documents from your network
- Complete document management; all related documents can be stored in one place for quicker access from the office network

## Support and Compliance

- 24/7 support including server monitoring, call tracking, and logging using RES' 'Software as a Service' gateway
- A comprehensive audit trail for each entry into the system aids in the compliance requirements under Sarbanes–Oxley for Canada and the United States

## Benefits

---

### Control Over Expenditures

- Improved control over operations and capital spending
- Improved decision making through real-time daily reporting
- Protection against unauthorized spending and the mitigation of cost overruns with built-in security and preset user rights
- Superior AFE reporting solutions – generate standard and customized reports including accruals, variance, summaries and more

### Reporting and Managing Costs

- Improved decision making through daily reporting updates
- Comprehensive reports for comparison and analysis
- Identify source of bottlenecks
- Manage costs while saving time and money

### Easy Set-up and Improved Fiscal Information

- Quick ramp-up and implementation combined with support access for all users through RES' new "Software as a Service" gateway, while minimizing IT and support costs
- Improved corporate accountability, minimizing risk of fiscal and directorship liability, while increasing the Board's confidence in corporate and fiscal operations

EMPACT + COMS combine to create enterprise-class software that covers a wide range of in-field data tracking tasks as well as offering a detailed budgeting and expenditure control system. To truly gain a better understanding we encourage you to call us at (403) 245-0220 for a demonstration.
