

SaaS (Software as a Service)

Benefit from all the power of Resource Energy Solutions' software whether you are working in oil, gas or mining by signing up for our 'Software as a Service' option. If you are in oil and gas you get access to Wellman or AFE or both if you wish. If you are in mining you get access to EMPACT + COMS is an integrated product.

Features

- Access to enterprise-class project and cost management tracking software for the oil, gas or mining industry
- Access to a hosted client server located in a secure co-location data bunker with redundant Internet
- RDP access to a hosted customer server located in a secure data bunker
- RES will provide all terminal services, Microsoft Windows Server, Microsoft Office, and Microsoft SQL Server licenses
- Data will be hosted on an MS SQL Server located in the same data-bunker
- RES will handle all IT-related duties on the server, including patches, upgrades, main maintenance, and the creation and maintenance of customer user accounts
- Secure communications is accomplished using Federal Information Processing Standard (FIPS) – compliant encryption through a monitored firewall with restrictive ACL and a protocol filtering policy
- The server is subject to regularly scheduled downtime and typically a reboot in order to install upgrades
- Customers are notified of all scheduled maintenance at least 2 days in advance

Benefits

- No need to buy or lease a server
- No need to buy or install software
- Log in from anywhere
- Federal Information Processing Standard (FIPS) data security compliant
- Defence Information System Agency (DISA) data security compliant
- A comprehensive project cost management and tracking software designed for the industries of oil, gas or mining, accessible from anywhere,
- All IT related duties are managed for you
- Support of an IT department without the costs
