Empowering your information

**AFE Manager**  
Oil & Gas Edition

**AFE Manager from Resource Energy Solutions**

Authorization for expenditure and capital tracking software provides increases in efficiency, control, and accountability, while streamlining the workflow process. Compliance is achieved through auditing, and detailed cost-tracking.

# CAPITAL PROJECT CONTROLS FOR THE OIL AND GAS INDUSTRY

## OVERVIEW

AFE Manager is a comprehensive capital and operational asset-tracking workflow system. It coordinates the entire planning, administering, reviewing, approving, budgeting and tracking process, and provides cost management efficiencies and accountability during the entire financial life cycle.

A key benefit of AFE Manager is that it enables a company to clearly define its spending governance processes, specifically for the financial, legal, technical and executive management teams.

Upstream, Midstream or Regulators – “We can meet all of your AFE budget management needs”.
