CAPITAL PROJECT CONTROLS FOR OIL AND GAS REGULATORS

KEY BENEFITS

- ✓ Standardized cost management processes from operators-to-regulator
- ✓ Increased cost accountability to the state for operating companies
- ✓ Full capital project management from spending approval through project close out
- ✓ Improved data flow of capital project information
- ✓ Improved accuracy of critical data
- ✓ Improved productivity through:
 - Workspace & dashboards
 - Streamlined customizable workflow & communication
 - Intuitive navigation
- ✓ Completely web based and cloud enabled
- ✓ Strong security, data integrity, auditability and compliance

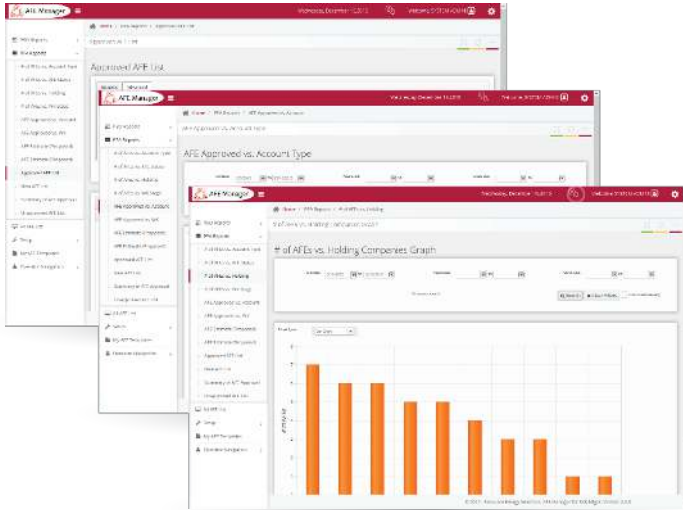

AFE Manager Regulator's Edition provides capital project controls for oil and gas regulators to manage development costs for state owned assets, developed and operated by domestic or foreign companies.

Managing the development of state owned oil and gas assets through cost recovery processes is a difficult endeavor for both the state and for participating operating companies.

Accountability to the plan and to budgets, are the keys for success but clarity is often obscured by inefficient processes and unreliable data exchange over email and other channels.

AFE Manager Regulator's Edition, the only solution available in the market today that is built specifically for oil and gas regulators implementing cost recovery processes and seeking to maximize capital gain for the state.

REPORTING AND WORKFLOW

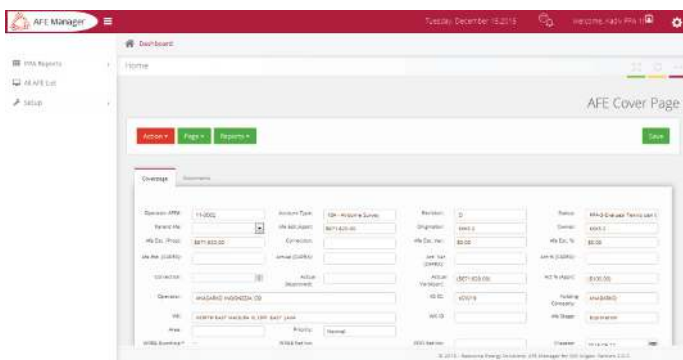

AFE Manager Regulator's Edition is designed for oil and gas regulators to address the needs for controlling capital spending associated with cost recovery regimes and production sharing contracts.

Providing standardized reporting from all operating companies to oil and gas regulators to ensure that capital investment is put to its maximum use and benefit for the state or country.

AFE Manager Regulator's Edition is the only solution available in the market today that addresses these needs.
